# BENTON COUNTY SNOWMOBILE CLUB

Once again we close the books on another season of 'riding'. I certainly use that term loosely to describe the winter of '23-'24. For every yin there is a yang, and we paid the price for the awesomeness that was the previous season. But, time marches on, so there is no use in crying over spilled milk. In lighter news, we had our trail down party, and once again Kevin used his razzmatazz smoking skills and gave us our main course. He was smoking ribs at the groomer shed while the rest of us were still asleep. That's caring folks, and that's what we snowmobilers do. We care about the landowners, we care about our fellow snowmobilers, and we care about the future of our sport. That is also why we try and make things easier for our working crew out at the groomer shed. It's one thing to make it to a meeting, it's another thing to donate your time on Wednesday evenings, repairing all of the equipment and keeping everything running well. That's a lot of work. I take care of everything in our home. Things run like clockwork. You don't see me fixing our fridge before work in the morning, but it gets done because time is limited. Since our clubmember's time is limited also, wouldn't you like to help them out? We have the big fabric building project this summer. Yes, we will be erecting this structure on the club's property. Please come and help, as many hands make light work. Thank You. Watch for emails..
